You can use it without a keyboard, since it supports browser and mobile-apps. To get you started and to integrate it into your World of Warcraft experience: We will add all the features needed to support your guild. It has already supported Tank and Healers since the Beta 4, but our goal is to have any kind of class or role supported at once. That also means, we will have full support for classes like Warlocks, Monks, Rogue, Demonology, etc.. First of all, we have changed the interface and rearranged all the features, making them more accessible and easy to use. You will be able to read and manage all the data easily and quickly. We have implemented a new System to split the data automatically. This has a lot of benefits, among them, you will be able to see the data of your guild members in all the available tabs. The result is that you can keep an eye on all your guild members' data from different aspects and can share it easily. It also features a completely new interface that has been designed to be fully functional and usable without a keyboard. We have also implemented some additional features to make it user friendly and make it easier to navigate through the application, making it a lot faster. Our website is currently running on a Windows Server 2003 and has been tested and working for months without any kind of issues. We are currently working on implementing the most important features of the new version 2 of our addon and will be back with more information as soon as possible. To get started just install the addon by adding it to your World of Warcraft addons list (File > User Interface > Addons > World of Warcraft > Addon (Admin)) and wait for updates to appear in your game and our website. Some more information about the new version 2 of our addon: — ■ Overview A quick DKP V2 is an addon for World of Warcraft that aims to handle every aspect of the DKP management of a guild. Its goal is to stay completely in-game. . You can use it without a keyboard, since it supports browser and mobile-apps. To get you started and to integrate it into your World of Warcraft experience: We will add all the features needed to support your guild. It has already supported Tank and Healers since the Beta 4, but our goal is to have any kind of class or role supported at once. That also means, we 82157476af
