Honestly, I love this skin. You can style on your foes by playing Snake instead of fighting them, and even to that point, the pixel explosions seem to have a clearer hitbox. Perfect for an upcoming Elli main. I haven't played the game much, but this skin further cemented my love for the Projectile Spamming Wifesnake that's Elliana.. Great skin for my main, love that the snake taunt is fully playable, sometimes i just chill in the playtest to play it for fun..
